# ARTIFICIAL TURF BACKINGS

# Recyclable artificial turf solution

## INTEGRO® series

### The next-generation solution towards a circular economy

Sustainability meets durability with **MATCO INTEGRO®**'s recyclable secondary backing solutions.

### Play Hard — Recycle Smart

- End-of-life grass carpets are fully recyclable
- Zero landfill

- FIFA approved
- Better dimensional stability
- Better tuft lock

- Benefits economic growth, ecological impact, and circularity
- Suitable for existing machinery

- 100% single polymer solution: recyclable alternative for latex & PU binders

### One DNA. Zero Compromise Powered by INTEGRO®

MATCO is presenting its **INTEGRO®** series as the next generation water-based thermoplastics binders for various carpet backing solutions.

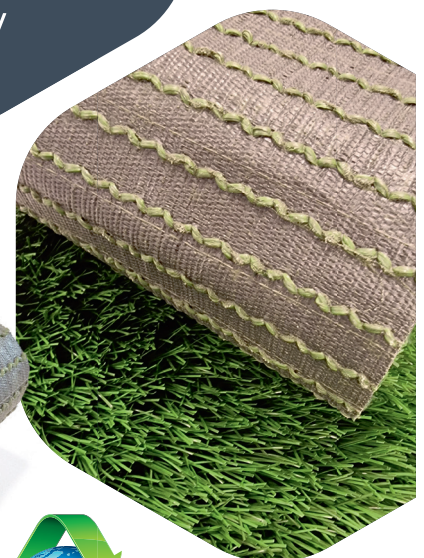

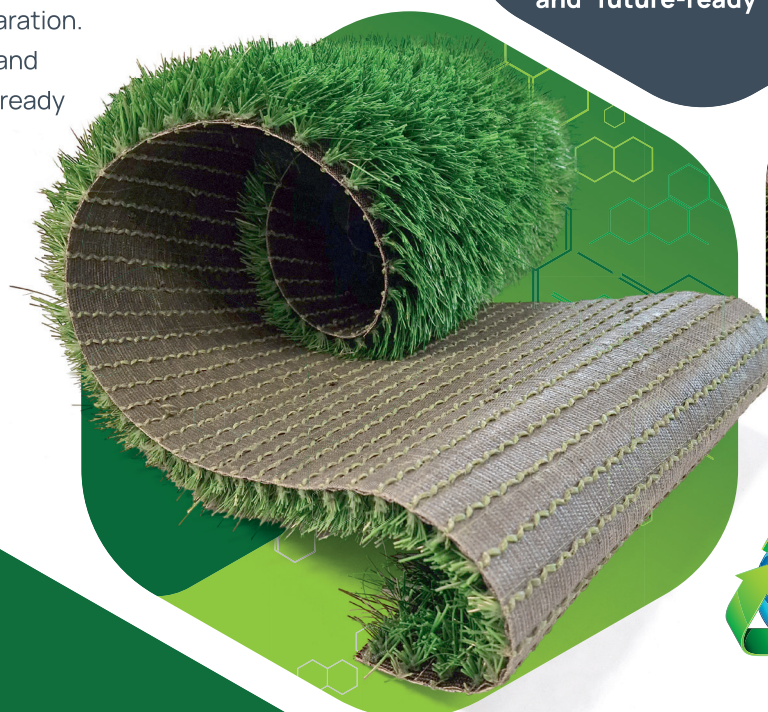

### Sustainable by Design

Using our innovative **INTEGRO®** secondary backing in a monomaterial system results in a game-changing technology. No more complex separation. No landfill. Just clean and circular design that is ready to go again and again.

### WHY IT MATTERS:

- Fully recyclable and reusable - Zero landfill
- Circular by design - Back into the system, not into the ground
- One DNA - Simple, clean, no incompatible glues and future-ready

**Built  
to play,  
designed  
to stay.**

# MATCO GB series

## High performance systems for artificial grass

**MATCO GB** series are high performance X-SBR latex based precoat and foam-coat systems for artificial grass.

Especially developed and designed to endure intense sports activities, padel, tennis, multi-sport or landscape.

Presented as a pre-filled pre-coat or foam-coat systems.

Fulfills the highest FIFA standards and are 100% tailor-made and designed according to customers' processing requirements.

**All products are formulated according to your specific requirements.**

## MATCO

## compounding

### Reliable partner

**MATCO nv** is a reliable partner and producer for all types of coatings and compounds for tufted, woven, needlefelt, automotive, artificial turf, aviation carpets, and upholstery, along with a full range of functional additives, such as thickeners, dispersants, surfactants...

**MATCO** can offer compounds based on different types of binders, such as latex, VAE, PE, PU, AC, PVA, PVB, POD...

## PRODUCT RANGE:

- PRECOATS
- DOUBLE BACKING
- NO GEL FOAM
- GEL FOAM
- ADDITIVES:
  - Thickeners / Dispersants
  - Surfactants / Gelling agents
  - Wetting agents
- CURING PASTES
- FR COMPOUNDS
- ARTIFICIAL TURF COMPOUNDS
- WOVEN AND NON-WOVEN SOLUTIONS
- DISPERSIONS OF:
  - ZnO / Antioxidants / TiO<sub>2</sub>
  - Accelerators / Colourants
  - Other on demand

# Flame retardants

A new non-hazardous flame retardant dispersion range **MATCOFLAME** is in development. The dispersions are:

- Halogen-free
- Heavy Metal-free
- Free from labelling
- Oeko-Tex ACP compliant

The **MATCOFLAME** range is suitable for upholstery, curtains, tents, carpets, automotive, and aviation applications. Matco Chemicals can also provide ready-to-use FR compounds or collaborate to develop customized solutions.

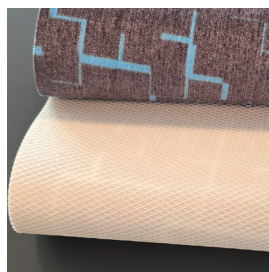

For tailor-made FR dispersions, contact our experts for assistance.

## TPE Polymers

**MATCO CHEMICALS**  
**THERMOPLASTIC ELASTOMER**

backings are transforming the carpet industry with their eco-friendly, fully recyclable nature. Unlike traditional materials, TPE requires no water during production or application – making it an ideal solution in a world where sustainability is no longer optional, but essential. These backings not only contribute to zero-waste production processes but also support a cradle-to-cradle lifecycle.

Beyond carpets, TPE opens doors to a wide range of innovative applications. In the automotive sector, it delivers lightweight, durable, and recyclable interior components. For anti-slip solutions, its flexibility and grip make it perfect for mats and safety surfaces.

And in injection molding, TPE offers excellent formability, allowing for efficient, high-quality production of various custom parts.

**The Future  
is Flexible:  
TPE Backings  
for a Greener  
Tomorrow!**

Different or  
tailor-made  
grades and  
colours on  
demand.

### MATCOFLEX 100

- SEBS based
- Premium grade
- Low application weights (400–600 g/m<sup>2</sup>)
- Shore A 65

### MATCOFLEX 200

- SEBS based
- Economic grade
- Higher application weights (> 600 g/m<sup>2</sup>)
- Shore A 50
